IBM System x3500 M4

Scalable enterprise-quality data center server for the most demanding applications

Robust features accommodate growth

A high-performance dual-socket tower server, the IBM System x3500 M4 can deliver the scalability, reliable performance and optimized efficiency for your business critical applications. Start with the basics and upgrade as your business changes without jeopardizing existing investments.

Virtualizing the PC infrastructure into one server can provide access to a powerful server with abundant storage space, while significantly reducing IT costs.

Triple the storage capacity

The x3500 M4 supports the latest Intel microarchitecture, delivering intelligent performance enhancements that adapt to your workload environment. The x3500 M4 provides triple the storage capacity of the x3500 M3 without the cost of external devices. A flexible design and consolidated server help optimize intensive workloads and provide greater utilization, making the x3500 M4 a great choice for small and medium businesses.

Simple to manage, easy to use

The Integrated Management Module 2 (IMM2) and Unified Extensible Firmware Interface (UEFI) BIOS give the x3500 M4 a consistent system level code stack for superior setup, configuration, and ease of use. Optional remote control features provide the ability to manage, monitor and troubleshoot from anywhere. Powerful and easy-to-use tools can help you manage both physical and virtual resources.

Select configurations of the x3500 M4 are part of the IBM Express Portfolio™ designed to meet the needs of small and midsized businesses. Easy to manage, Express models and configurations vary by country.
